

FAA Safety Team presents:

The Grey Areas of Unmanned Aircraft Systems UAS DronePro Forum

On June 21, 2016, the Department of Transportation's Federal Aviation Administration finalized the first operational rules for routine commercial use of small unmanned aircraft systems (UAS or "drones"), opening pathways towards fully integrating UAS into the nation's airspace. The new rule, which took effect on August 29, 2016 60 days after it is posted to the Federal Register, offers safety regulations for unmanned aircraft drones weighing less than 55 pounds that are conducting non-hobbyist operations. Attend this informative forum to learn about the Grey Areas of Part 107, the new rules and to discuss local and NC UAS issues. Click the link below and register TODAY.

This event is also available online - See SPANS # EA39121392 for further information regarding the Zoom Link.

Directions: Total Flight Solutions
Suite #200
Training Room
9 am - 4 pm
